

# NORTHERN PROVINCIAL COUNCIL

## STATISTICAL INFORMATION OF THE NORTHERN PROVINCE

- 2014 -

CHIEF SECRETARY'S SECRETARIAT  
NORTHERN PROVINCE

## **PREFACE**

It is with great pleasure to release the “Provincial Statistical Information 2014” for the Northern Province. This is the sixth publication in the series with modification.

Presently many rehabilitation and development activities are in progress in this province. Hence, this publication is to provide basic statistics and current information on demography and productivity and services sectors in the Northern Province for the use of decision makers and stakeholders who engage in relief, resettlement, rehabilitation and development programmes in Northern Province.

I wish to extend my sincere appreciation for the support extended by the district administrations and the provincial secretaries and heads of departments for furnishing relevant information.

Further, I am very much thankful to the Deputy Chief Secretary - Planning and Planning Staff who have actively contributed at different levels to make this publication.

Any suggestions views on further improvement will encourage for the preparation of better publication.

**R.Wijialudchumi  
Chief Secretary  
Northern Province**

# NORTHERN PROVINCE ADMINISTRATIVE BOUNDARIES

## **OVER VIEW OF THE NORTHERN PROVINCE**

### **1. Land and Soil**

The Northern Province embraces five districts namely, Jaffna, Kilinochchi, MannarMullaitivu, and Vavuniya. This covers an area of 8,848.21 sq.km accounting around 13.22% of the total land area of the island. This region has a forest cover of 1,981.30 sq.km. Inland water area covers 302.9.sq.km.

The land of the region is relatively flat and of low elevation towards the coast. Six major soilgroups have been identified in the region.The dominant group of soil in the region is Reddish Brown Earth (RBE). The association of Low HumicGley (LHG) with RBE soil (92%) is well suited for paddy cultivation. Red YellowLatesol, Non-Calsic Brown soil and Grumusol exist in Kilinochchi, Jaffna and Mannarreasrespectively. The RBE has low organic matter content and the nitrogen and phosphorusstatus is usually low while potassium status varies from medium to low. These soils are verywell supplied in calcium and magnesium, and they have a very good cat-ion exchangecapacity. By tropical standards, these soils could be considered as having a very goodchemical quality. The other soil types are alluvial of variable drainage and texture (4%), RockKnob Plain (2%), Erosion remnants (1%) and SolodizedSolonets&Solonchaks (1%)

### **2. Weather and Climate**

Sri Lanka enjoys a typical tropical monsoonal climate. The Northern Province tends to be hot and dry in the dry season (February to September), and moderately cool and wet in the wet season (October to January). The province's climate is of the tropical kind and therefore during monsoons there is always the chance of a deluge. In the lowlands the climate is typically tropical with the average temperature is around 28° to 30° for the year. However, on the whole, January is the coolest month and May is the hottest month. Relative Humidity varies from 70% during the day to 90% at night. The Dry Zone of the Sri Lanka is the north and east of the island, this region is affected by the north east monsoon(December to March) and southwest monsoon (June to October). It is thought to be dry because most of the rains fall during the north-east monsoon.

Annual rainfall is less than 1250 mm in the north west and south east of the Inland. It has two rainy seasons South West Monsoon- May to August, North East Monsoon- November to February

### **3. Economy**

The Northern Province is still pre-dominantly an agricultural region having crops, livestock and fisheries as pivotal sub sectors. Reflecting the rapid expansion in income generation activities in the province, the GDP growth rate was highest in the province at 25.9 % in 2012 and it's share of 4% to the national GDP and there is an improvement when compared to 3.7% recorded in 2011. This shows that there are potentials in the Northern Province and that should be tapped. The structure of the provincial economy has not changed over the period. However, Agriculture, including Fisheries and Animal husbandry which is the mainstay of the economy has shown positive growth after 2009. Therefore, the agricultural sector contributed 19.6% of GDP composition to the provincial economy in 2012. The growth rate has now reached a slight positive phenomena resulting in a per capita Income of Rs 288,000 in 2012 and as it was Rs202,000 in 2011.

### **4. Agriculture**

Agriculture is the dominant productive sector in the Northern Province. Result of the rapid development of the agriculture sector in the Northern Province; paddy harvesting reached the level of 217,149mt in 2013 and the Province was able to supply its surplus to other parts of the country. 56,277 ha highlands brought under annual crops, perennial crops and homesteads cultivation in 2013.

### **5. Livestock**

The livestock industry is becoming an important field for entrepreneurs in the Northern Province. This sector is considered as an additional source of income for the farming society in the region. Several stakeholders i.e. government sector, private sector and NGO's are involved to strengthen the sector through their various projects and programmes. Average milk production reached 70,063 liters per day and milk collection reached 27,150 liter per day in 2013. Meat production that chicken reached to 11,287 Kg. per day, beef reached 7,836 Kg. per day and mutton reached 1,887 Kg. per day. The egg production reached 85,760 nos. per day.

## **6. Irrigation**

Irrigation sector is one of inter related sector to the agriculture and inland fishing. Therefore, hundred thousands of people in the province are dependent on irrigation for their livelihood activities. So, this sector takes a vital role in the Province. 45 medium irrigation schemes and 9 major irrigation schemes come under the Provincial Irrigation sector. In addition to this, there are 3 major tanks that come under the central administration. There are 2,066 tanks and ponds also under minor irrigation. Nearly 70,181 acres irrigable areas came under irrigation facilities in 2013.

## **7. Education**

The Education sector needs significant changes at all levels to bring Sri Lanka as a Knowledge hub. The Northern Province takes this opportunity to accomplish the national goal according to the “MahindhaChinthana”. The number of functional schools have been increased to 989 out of 1,066 to serving for 252,059 students with 14,583 teachers in 2013. National programmes such as 1,000 schools and 5,000 feeder primary school programmes are being successfully implemented in the Province. Child friendly approach has been introduced in 500 schools. Mahindodaya Lap facilities have been provided to 90 schools in the Province. Infrastructure facilities are also continuously provided wherever the requirements are identified through various sources. Therefore, the adult literacy rate increased to 88% and the rate of attendance at schools has also increased to 73% in 2013. Sports and cultural affairs also are included as sub sectors. Further to the secondary and primary education, the higher education and tertiary and vocational education centers are also established in the province such as University of Jaffna, Vavuniya Campus of the University of Jaffna, Open University of Sri Lanka, National College of Educations, Teachers’ Training Schools, Technical College and Advance Technical Institute being the main educational Institutions in the province.

## **8. Health**

Health is the wealth of our society; therefore, the health sector takes prominent role in the Province. The sector serves through western medicine and eastern medicine to the people in the Province. There is one teaching hospital, 4 general hospitals, 7 base hospitals, 52 divisional hospitals 33 primary medical care units , 5 district AyurvedicHospitals, 11 Ayurvedic Central Dispensaries and 69 free Ayurvedic dispensaries which are functioning in the province. Primary, Secondary health care

institutions, curative as well as preventive institutions are mainly managed by the Provincial Health Department. Maternal and child health care services have been extended to the peripheral areas and human resource capacities also strengthened in 2013. As a result, maternal mortality rate and infant mortality rate have been reduced. Dengue eradication programme and local level nutrition intervention programmes also have been implemented in 2013.

### **Natural resources and Development in the Northern Province**

The Northern Province is rich in natural resources in its extensive coastal area, in its dense forests and its mineral deposits. Forests resources are largely intact despite many decades of conflict and form a considerable percentage of the total forest cover in the country. From extensive sand dunes in Jaffna peninsula, to quarry metal and clay for bricks the Province is especially rich in mineral resources needed for construction. The land is generally flat and undulating with no significant elevation, however the highly diverse coastal belt more than compensates. Lagoons, bays, salt flats, wetlands, coral reefs, islands and islets, and estuaries are some of the prominent coastal features that are important both ecologically and economically.

### **Water Resources**

The Northern Province does not have a single perennial river, and very limited seasonal streams and rivers. Traditional water storage was through built irrigation tanks. The area belongs to the Dry Zone of Sri Lanka with low annual rainfall. The ground water surveys done prior to the conflict indicate that intensive agriculture, especially paddy, cannot be supported without adequate replenishment of surface water storage. Water scarcity is a main constraint in many parts of the province, even for drinking and domestic use.

The major tank cascade systems and existing major irrigation schemes (Iranamadu, Giant's Tank, Pavakkulam, Kalmadu) should be closely examined to determine the productive capacity of agriculture and irrigation, plus quality of drinking water available in the northern districts.

## **Marine and Coastal**

With 40% of the country's coastline, the province has immense potential for fisheries, aquaculture and tourism. While the existing marine and lagoon-based fishery industry need to be modernized and reequipped to enable the population to benefit from the rich and under tapped fishing grounds, new aquaculture-based industries could be established to elevate productivity and offer more livelihood options for young people.

The main fishery areas are in Jaffna, Mullaitivu and Mannar Districts.

For this purpose the fishery potential, looming threats and important conservation areas (such as sea grass beds and coral reefs) should be surveyed and mapped so that exploitation of the resource is done within the limits of sustainability with adequate emphasis on conservation and protection for future use.

## **Mineral Resources**

One of the greatest issues of current importance is construction materials. Out of the construction materials required sand and quarry metal are considerably available in the Province. In addition the province has limestone deposits, clay for bricks and tiles and beach mineral sand. Some scientific option of possible oil deposit off the Gulf of Mannar has not been fully explored yet.

A survey of the quantity and quality of building materials available in the north and their extraction capacity is necessary because of the huge demand brought on by reconstruction and development projects that involve large-scale construction.

## **Forests and Wildlife**

The North has by far the most extent of dry monsoon forests in any province. The forest cover has remained intact largely despite the conflict and due to lack of development of the province. Kilinochchi, Mullaitivu and Mannar districts are extensively forested, while Vavuniya is partially in forest. Jaffna has no significant forest areas.

The important wildlife areas (already gazetted) are Wilpattu north, Madhu road, Giant's Tank, Chundikulam and Kokilai. But this does not take in to consideration new biodiversity hotspots and other ecologically important areas (river catchments, salt marshes, lagoons and estuaries, islands, arid zones of Mannaretc).The forest and

wildlife reproduce is important as an economic resource for forest products (non – timber) and tourism.

### **History and Culture**

There are many areas in Jaffna and Mannar of exceptional archaeological value. These include ancient temples and sites mentioned in chronicles, sites of pre-historic significance and old churches and temples of high cultural value to the northern people.

Many of these sites have been recorded in documentation of the Archaeological Department, but there could be many that are unrecorded and undiscovered. The value addition prospects to local tourism is immense, especially sites such as Thiruketheeswaram (Mannar), Nallur (Jaffna) Nagatheepam (Jaffna) and MadhuChurch (Mannar).

## TABLE OF CONTENTS

<b>01.</b>	<b>Land, Soil, Forest and Climate</b>	<b>01 - 35</b>
1.1	Land Area of Northern Province by District	01
1.2	Area of Divisional Secretary's Divisions - Jaffna District	02
1.3	GN Divisions in Divisional Secretariat Divisions - Jaffna District	03
1.4	Area of Divisional Secretary's Divisions - Kilinochchi District	10
1.5	GN Divisions in Divisional Secretariat Divisions - Kilinochchi District	11
1.6	Area of Divisional Secretary's Divisions - Mannar District	12
1.7	GN Divisions in Divisional Secretariat Divisions - Mannar District	13
1.8	Area of Divisional Secretary's Divisions - Mullaitivu District	16
1.9	GN Divisions in Divisional Secretariat Divisions - Mullaitivu District	17
